# Mid-Century Modern Media Cabinet
By **DIY Huntress**

**Difficulty**

Moderate

Mid-Century Modern media cabinets don't have to break the bank. Check out how simple it is to build trendy storage on a tight budget! Hint: it only took one sheet of plywood to build!

# Tools

## Kreg Tools

## 2 Make Cuts

Use the cut list to make your cuts.

| | | |
|---|---|---|
| 34" | 34" | 21" |
| 15" top | bottom | side 15" |
| 15" side | shelf | 14 1/4" |
| 21" | 32 1/2" | back panel 21" |
| 17" door | door 17" | 32 1/2" |
| 22 1/2" | 22 1/2" | |

**5**

## Add Shelf (Optional)

Add a shelf to your build with 1 1/4" pocket hole screws & wood glue, if needed. I used mine for a 3D printer, so no shelving was added!

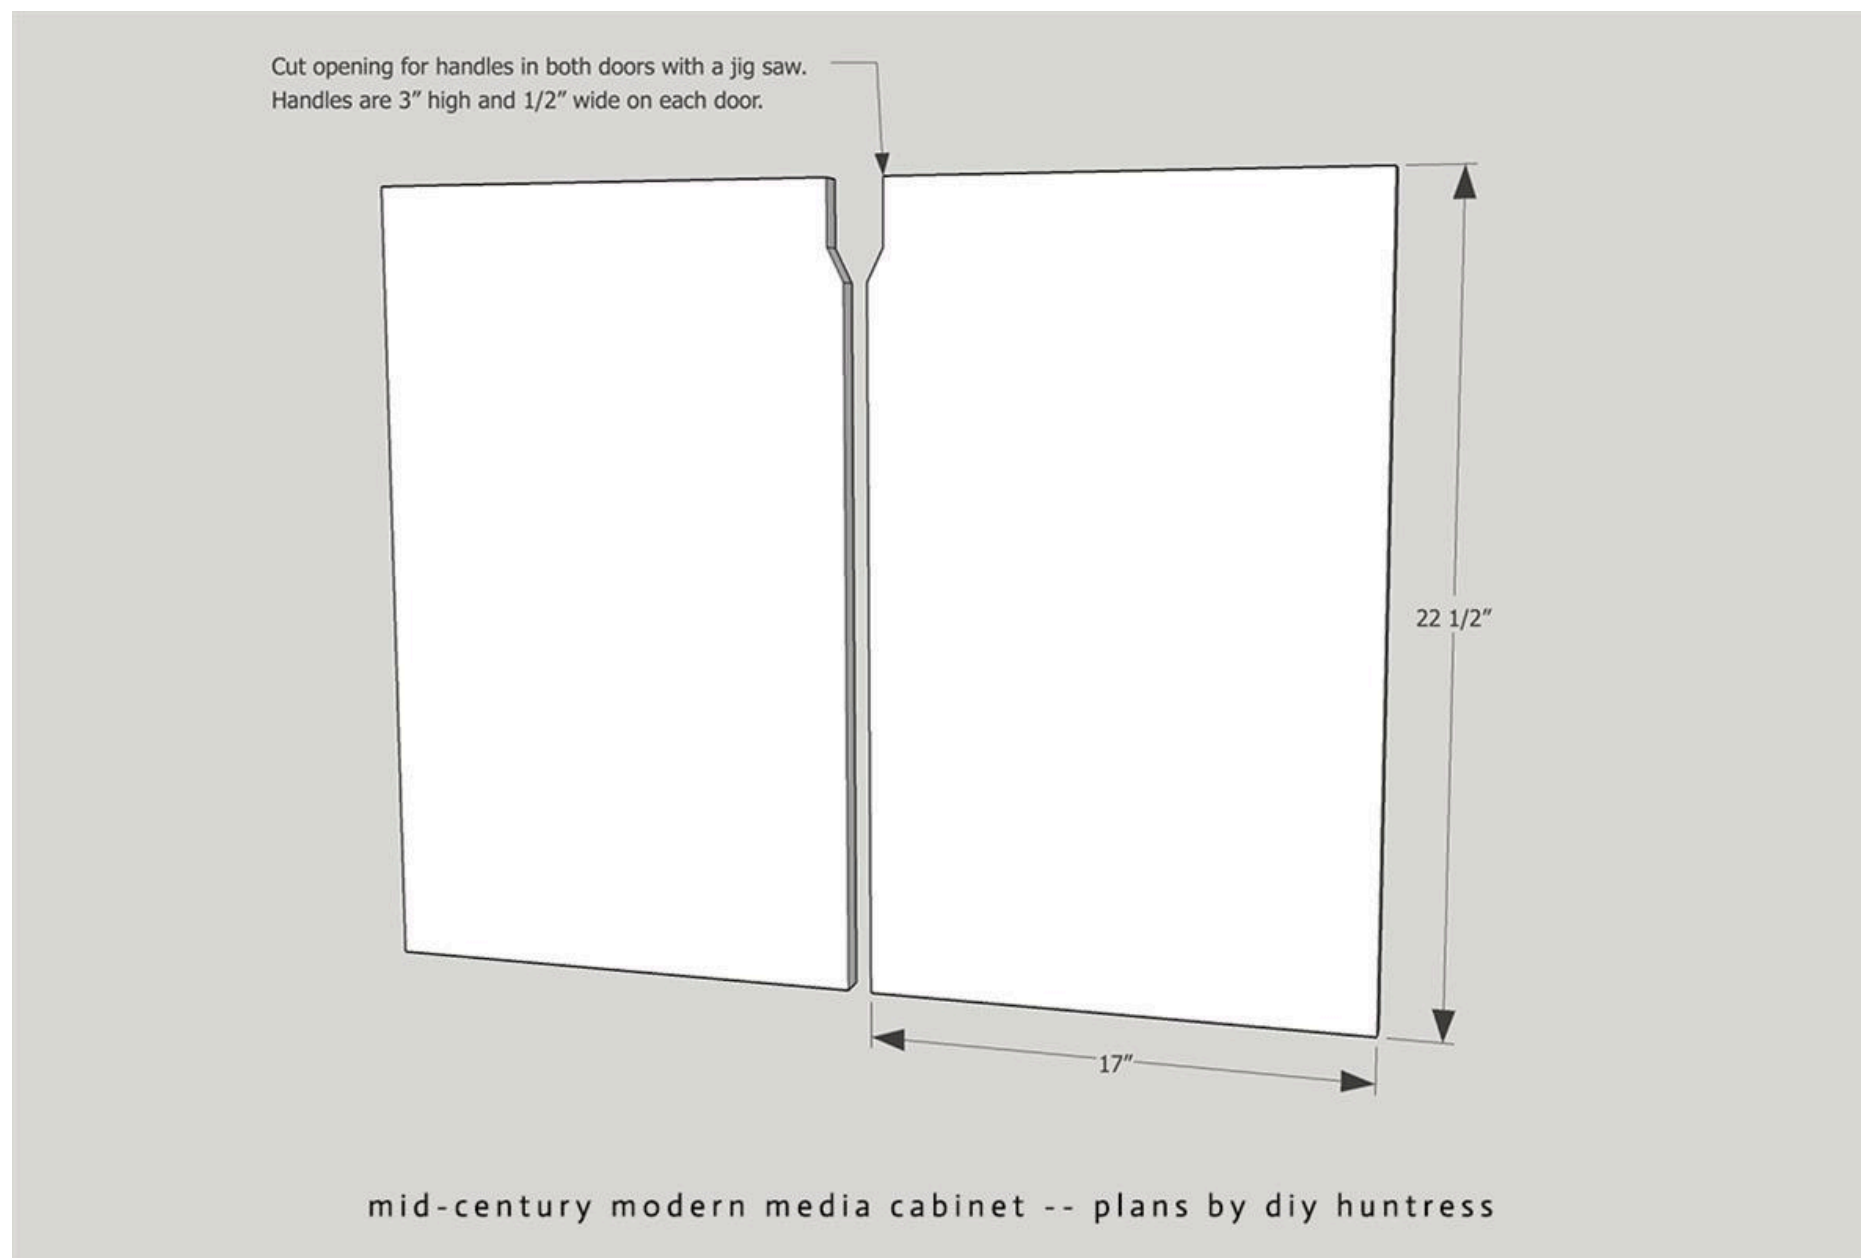

Attach shelf to inside of unit with 1 1/4" pocket hole screws & wood glue.

32 1/2"

## 6 Create Handle Cut Outs

Use a jig saw to create cut outs for the door handles. The ones on this particular cabinet are 1/2" wide and 3" tall on each door.

Cut opening for handles in both doors with a jig saw.
Handles are 3" high and 1/2" wide on each door.

22 1/2"

17"

## 7 Attach Doors

Use the Kreg cabinet hardware jig to add your full overlay concealed hinges.

Attach doors to cabinet using full overlay hingest.

When attaching doors, make sure to leave 1/8" gap between doors. This can be adjusted/customized when installing.
