

DIY Vase Holder

By **Erin Spain**

Difficulty

Easy

This wooden vase holder is a simple woodworking project (great for beginners!) and a fun decorative accent to any home.

Tools

Kreg Tools

[Kreg® Pocket-Hole Jig 520PRO](#)

Other Tools

Miter Saw

Drill

Sander or Sanding Block

Materials

Wood Products

- 1
- Pine Board , 1x4x6

Hardware & Supplies

- 1
- Paint Or Stain

- 5
- 1 3/4" Cylindrical Vases

Cut List & Parts

- 1 Top , 22" Long
- 2 Sides , 5" Long

Directions

1

Cut Your Wood

Cut your 1x4 board to the following dimensions

(1) at 22" long

(2) at 5" long

2**Drill Pocket Holes**

Use the Kreg Jig 520PRO to drill 2 pocket holes at one end of each of your 5" long boards.

3**Drill Holes for Vases**

Use a 2" Hole Saw Bit to drill holes along your 22" long board. First, measure and mark your center point. Drill your hole. From there, measure and mark so that the center of each hole is 4" apart (the outer edge of each hole should be 2" apart).

**4****Sand**

Sand your boards and use a small sanding block or sheet of sandpaper to smooth out the edges and insides of each hole.

5**Attach End Pieces**

Use 1 ¼" pocket hole screws to attach the 5" long end pieces to your 22" long board.

**6****Paint or Stain**

Finish your vase holder however you choose. For this one, I used a Provincial stain.

7**Insert Vases and Add Flowers**

Add whatever flowers or greenery you choose and enjoy your new decor piece!
