

Red Truck Present Holder

By **Oak**

Difficulty
Moderate

When I asked my daughter what I should make to hold presents under our tree, she said a box that looks like a red truck. Easy right?? Ha. I'd never seen anything like it, so I got to work!

Tools

Kreg Tools

- Kreg®
Pocket-Hole Jig 720PRO
90°
Corner Clamp [90° Corner Clamp](#)

 - Zinc
Pocket-Hole Screws [Zinc Pocket-Hole Screws](#)

Pocket-Hole Screws [Zinc Pocket-Hole Screws](#)

 - Solid-Wood Pocket-Hole Plugs [Solid-Wood Pocket-Hole Plugs Plugs--Pine](#)
- Other Tools**
- Pine
 - Miter saw

 - Jigsaw or scroll saw

 - Router

 - Sander

 - Drill

 - Tape measure

 - Speed square

Materials

Wood Products

- 1 Pine , 1" X 10" X 36"
- 1 Birch Plywood , 32" X 32" X 1/2"
- 1 Plywood Or MDF (Optional- For Details If Desired) , 1/4" Or 1/8"

Hardware & Supplies

- 1 Box Of 1 ¼" Pocket Hole Screws (See Tools List)
- 1 Box Of Box Of 1" Pocket Hole Screws (See Tools List)
- 1 Box Of Kreg Pocket Hole Plugs
- 1 Wood Glue
- 1 Paint Of Choice
- 1 Red Truck Design Of Choice (I Used A Design From Canva)
- 1 Wood Filler

Cut List & Parts

- 2 Trucks- Birch Plywood , 30"x1/2"
- 2 Pine , 1 X 10" X 6"
- 1 Pine , 1 X 10" X 24"

Directions

1

Step one

Using your miter saw, cut the pine board so you have one 10"x 24" piece (bottom) and two 10" x 6" pieces (sides).

2

Step two

With either a jig saw or scroll saw, cut out two 30" trucks from the 1/2" birch plywood. You can trace the design onto your board to cut, or cover your material in painters tape then glue the pattern on as I did.

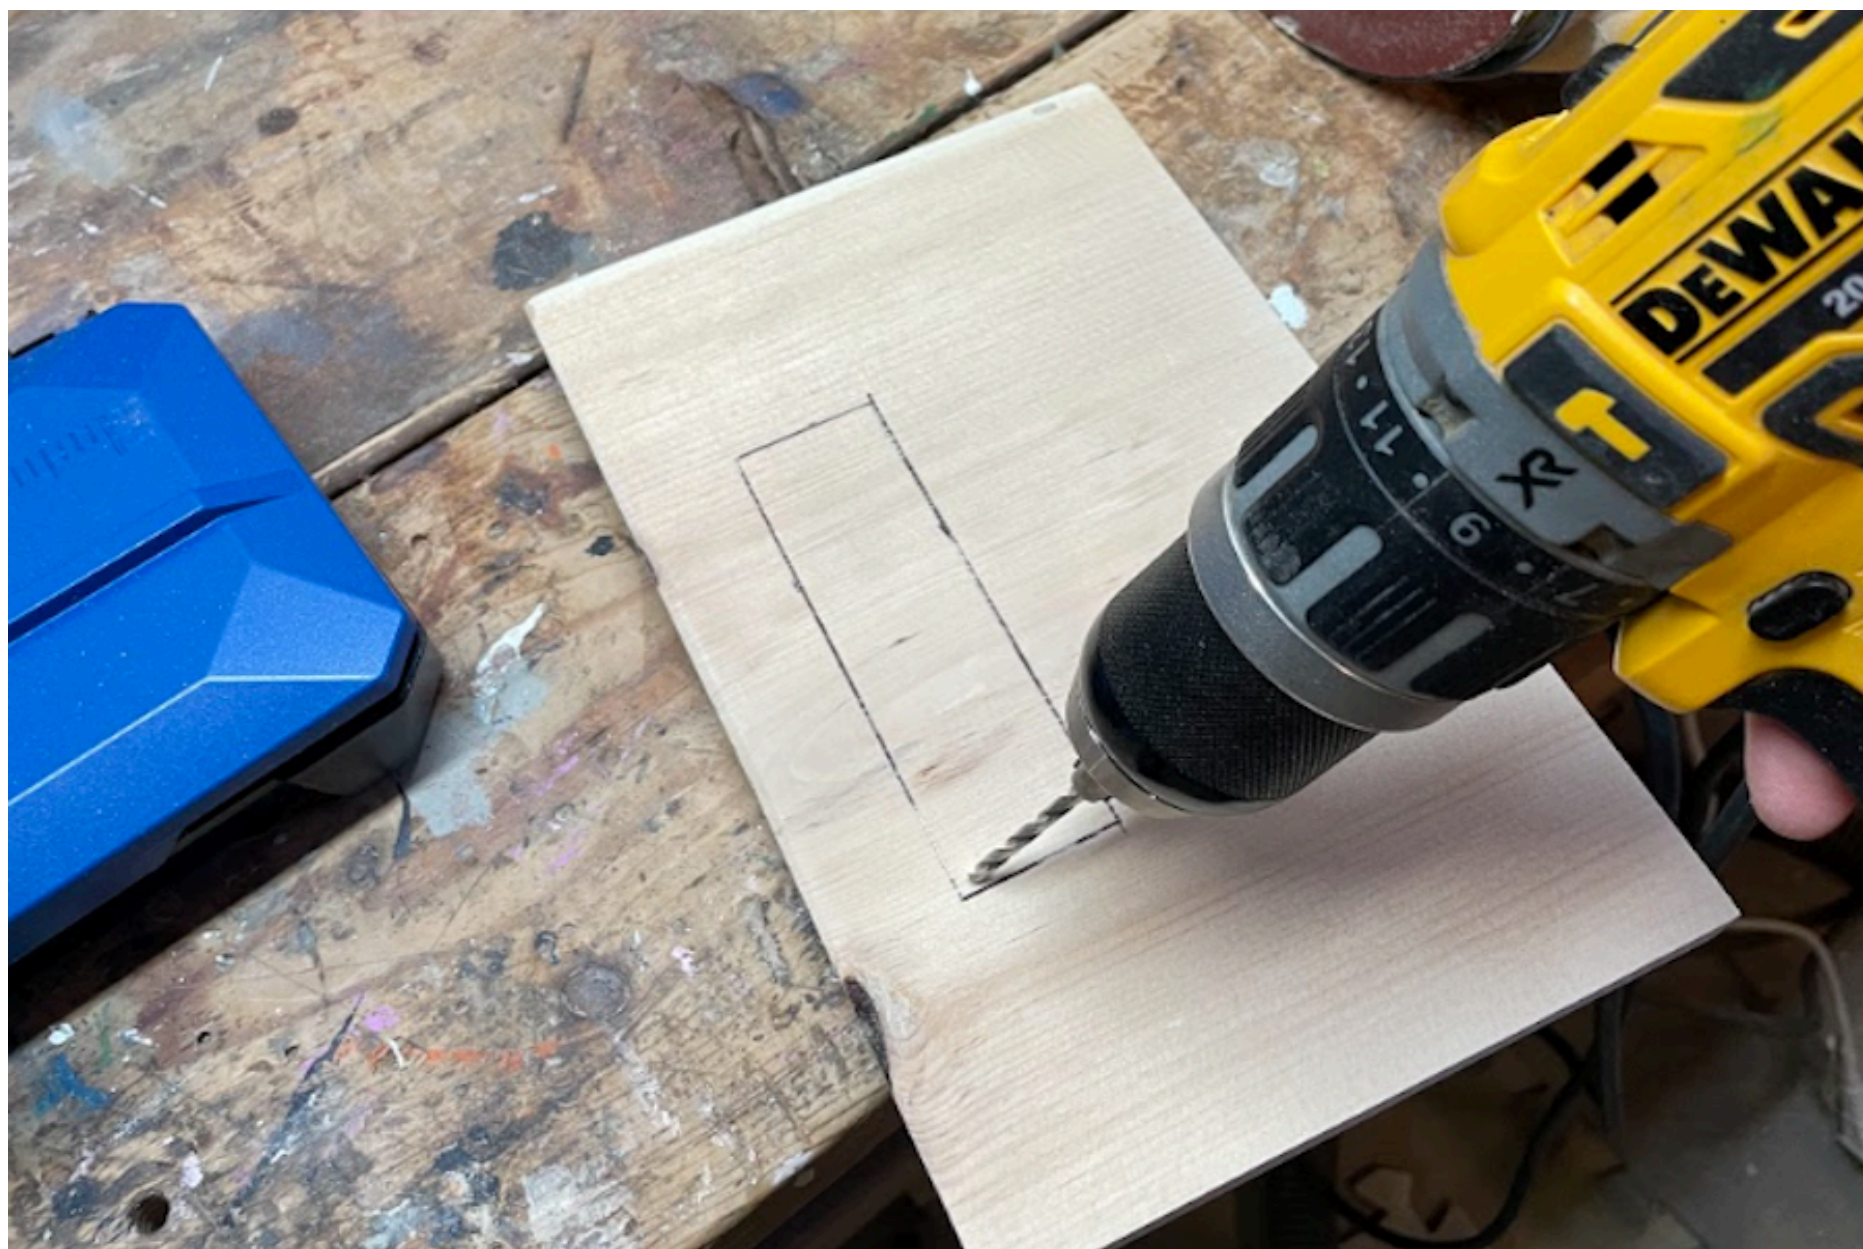

3**Step three**

On each of the 10" x 6" sides, draw the handle to cut out. Mark 1" from the top, 2.5" from the sides, and 3.5" from the bottom and connect using your speed square to create a rectangle.

4**Step four**

Drill a hole in the marked handle space big enough for your jigsaw or scroll saw blade to go through. Cut out the hole.

5**Step five**

Using a round-over bit in your router, round the edges of the handles from the front and back sides.

**6****Step six**

Sand all your pieces

7**Step seven**

On the bottom and sides, mark where you will place your pocket holes. For the bottom, I used 3 on each long side at 6", 12" and 18" and 2 on each sort sides at 2.5" and 6.5". On the sides, I used 2 on each short side at 1" and 4".

8**Step eight**

Set your pocket hole depth between the 1/2" and 3/4" markers.

9

Step nine

Drill pocket holes using your Kreg Pocket Hole Jig.

10**Step ten**

With the pocket holes on the bottom of the bottom piece, use your Kreg Corner clamps to attach the sides with the pocket holes on the inside using wood glue and a 1 1/4" pocket hole screw.

11**Step eleven**

Once the sides and bottom are attached, line up the box along one side of your truck and clamp in place with wood glue. Attach using 1" pocket hole screws.

**12****Step twelve**

Repeat on the other side.

13**Step thirteen**

Fill pocket holes with pocket hole plugs and wood glue. Use wood filler to cover any gaps.

14**Step fourteen**

After the glue has dried, you are ready to paint. You can cut out other details to make your design more 3D using 1/4" or 1/8" plywood or MDF. I chose to add windows, lights, hubcaps, a door handle and fenders. This is where your creativity can shine!
