- 1 3/4" Plywood , 11"X45"
- 1 3/4" Plywood , 20.5"X23"

# Directions

1

### **Cut Lumber**

Cut all of your face frame material from poplar boards according to the cut list. These are the pieces that will pocket hole together and make up the island face.

2

### **Cut Plywood**

Cut all of your 3/4" plywood materials according to the cut sheet. These are the materials that will make up your cabinet boxes.

3

#### **Drill Pocket Holes in Lumber**

Add all of your pocket holes in the frame pieces you cut previously.

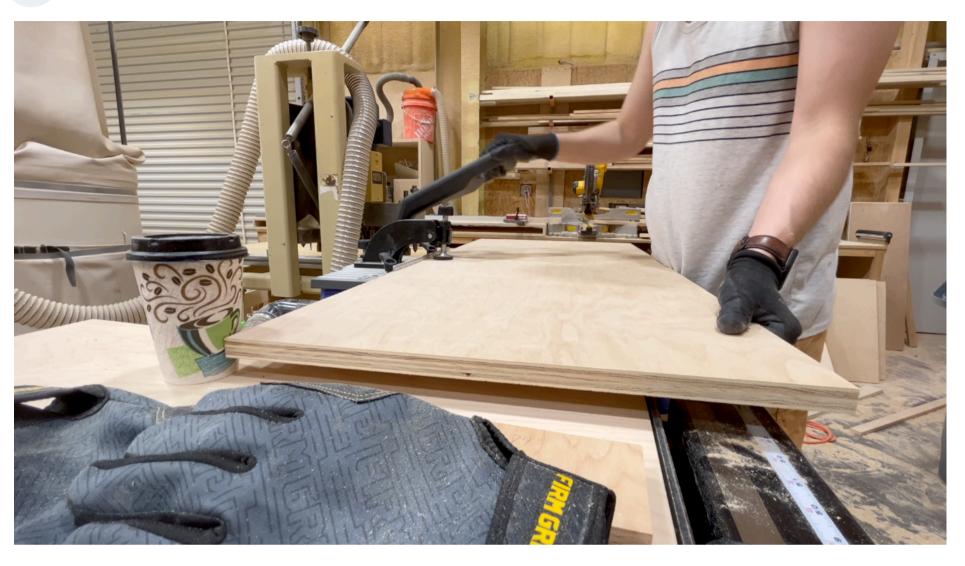

#### **Drill Pocket Holes In Plywood**

Add all of your pocket holes in the plywood pieces you cut previously.

#### **Secure 24" Island Side with Pocket Hole Screws**

Secure your 45" Deck to your 34.5" legs

## **Add Bracing**

Secure 45" long by 1.75" bracing in the top, bottom and front of your box.

## **Secure Faceframe**

Now that your box is finished staple on your face frame.

#### **Add Toe Kick**

Add your 3/4" toe kick to the underside of your cabinet. 3" offset from the face frame.

#### **Start Your Backside Cabinet**

Secure your 45" deck to your 34.5" sides. These pieces are your 11" 3/4 plywood pieces.

### **Add Bracing**

Just like with your 23" front side, you'll secure bracing to the top, front and bottom of your cabinet cavity.

## **Add Your Faceframe**

Secure the face frame for this portion with glue and staples, same as before.

12

#### Secure your two cabinets to eachother.

Drive screws through the top and bottom braces of your frontside cabinet into the adjacent top and bottom braces of the backside cabinet.

13

#### **Add Side Panels**

Add the side panels that you cut according to the cut list to hide the seam that your two cabinets make.

### Paint according to your preference.

Spray that bad boy!

### **Add Countertop**

If you choose to use butcher block material, now is the time to cut it to fit!

### **Secure your Counter**

Drive screws up through your braces into the countertop.

## Add doors and drawers

Add your custom doors and drawers that fit the openings you've created.

#### **Add Your preferred Hardware**

Pick out the handles and knobs that perfectly suit you and attach them to your doors and drawers.

### **Add Trim**

Along the base of your island, where it meets the floor, add trim so that it blends well and looks finished in that area.

### **Touch Up**

Fill any nail holes and caulk and paint all of the remaining seams.

## Enjoy!
