

# Garden Beds

By **The Learner Observer**

Difficulty

Easy

I've wanted to have a garden bed for so long, and though we tried a small veggie garden last year, the bunnies and squirrels got to every single fruit and vegetable we planted! This year I decided to up my game with a proper garden bed and my trusty Kreg Pocket-Hole Jig® 720PRO.

# Tools

## Kreg Tools

[Kreg® Pocket-Hole Jig 720PRO](#)

## Other Tools

Staple gun

Circular saw

Drill

# Materials

## Wood Products

- 9** Cedar Fence Boards , 1" X 5"
- 6** Cedar Fence Boards , 1" X 6"
- 13** Pine Boards , 2" X 2" X 42"

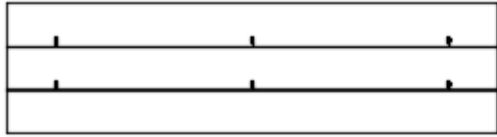

## Hardware & Supplies

- 1** 2" Wood Screws
- 1** Chicken Wire
- 1** 3/4" Staples
- 2** Outdoor Door Hinges
- 1** Outdoor Gate Latch
- 1** Landscaping Fabric
- 1** Limestone Screening
- 1** Pea Gravel
- 1** Tomato Cages
- 1** Lots Of Plant Babies!

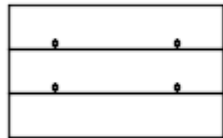

# Cut List & Parts

1 See Cut List Attached

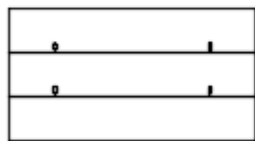

1X BACK & 2X SIDES:  
3 BOARDS EACH @ 60"

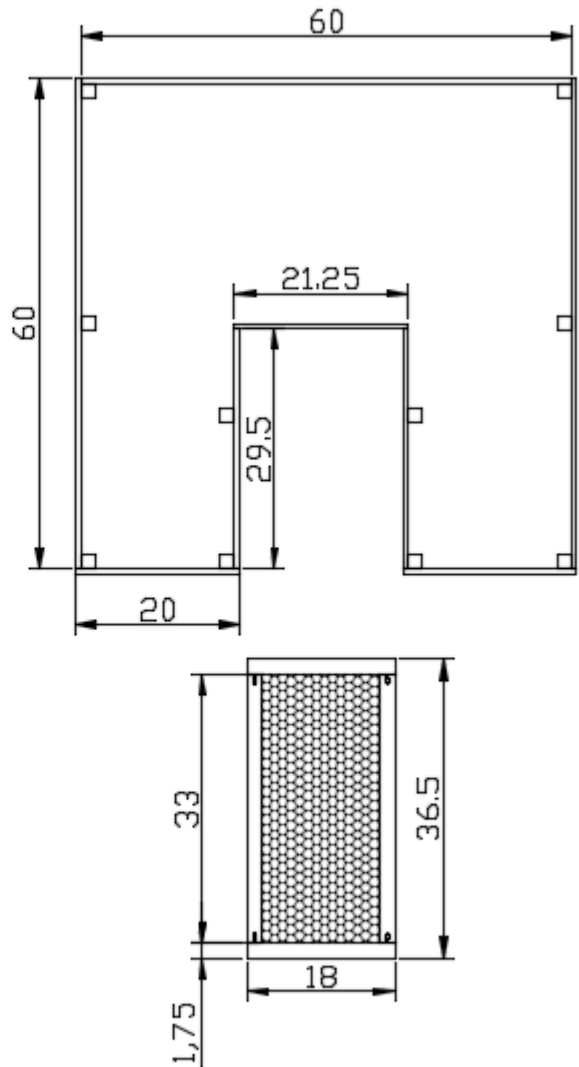

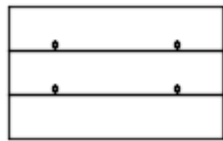

2X FRONTS:  
3 BOARDS EACH @ 20"

2X INSIDE SIDES:  
3 BOARDS EACH @ 29.5"

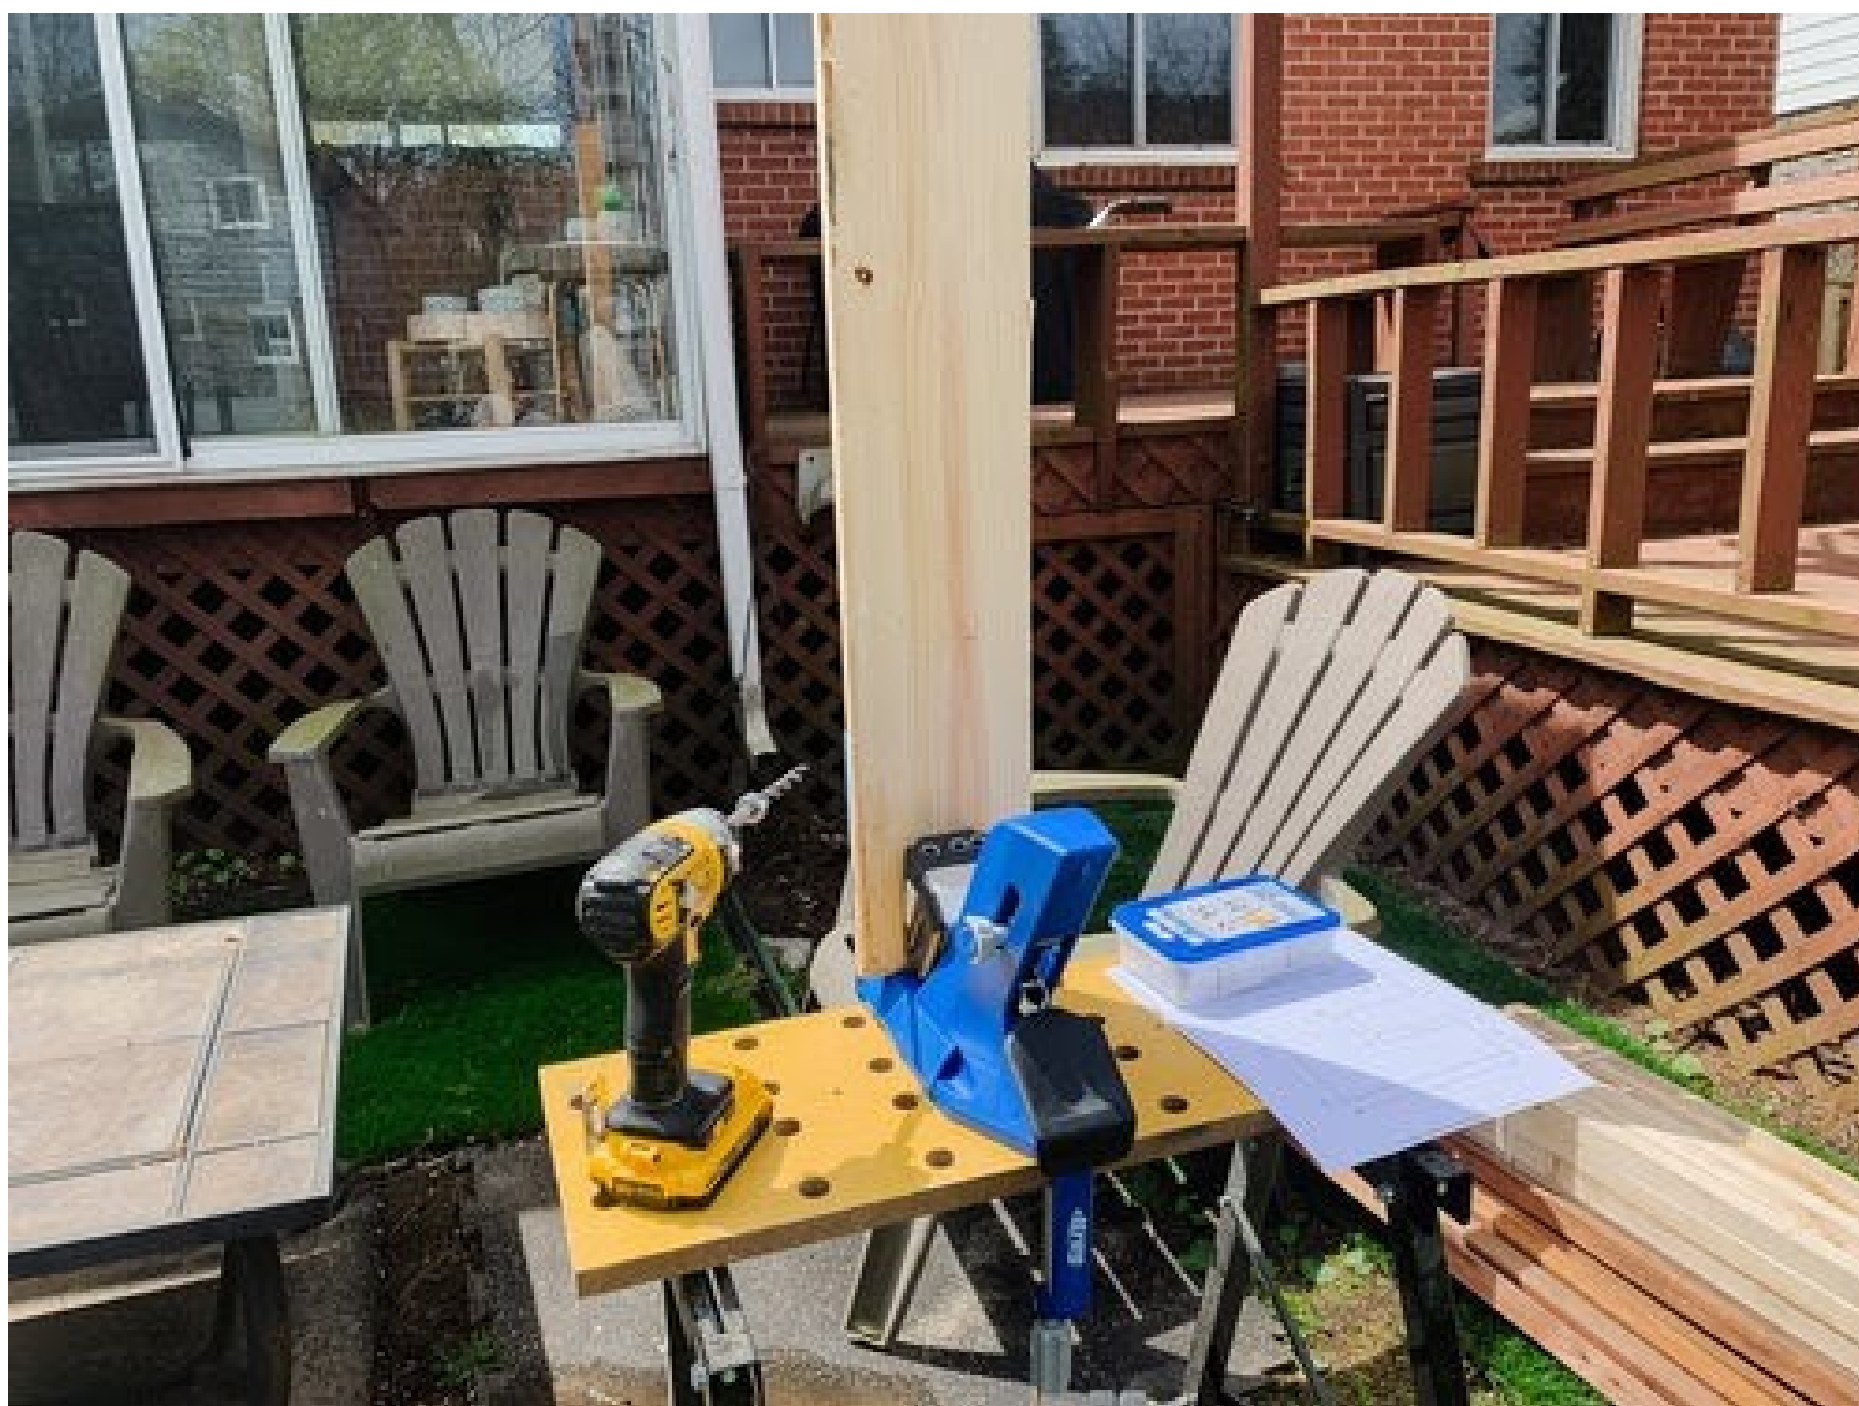

1X INSIDE FRONT:  
3 BOARDS EACH @ 21.25"

Cut all of your pieces down according to the cut list.

Once all of the pieces were cut and pocket holes were in place (you'll notice I originally had pocket holes in the 'corners' as well, but ultimately found them not to be necessary because of the landscaping stakes that the fence boards could be screwed into) we placed them where the garden was going to go and added in the stakes.

**3****Lay out your garden bed design.**

Start laying out your cut and pocket-holed boards in the shape of your bed. Attach them to garden posts at each corner.

**4****Pocket screw the boards together**

Join your boards together appropriately using Kreg screws.

**5****Add limestone screening and pea gravel**

Before filling your beds with dirt, add limestone screening and pea gravel.

**6****Fill in the beds with dirt**

Fill your beds with the desired amount of dirt.

**7****Add chicken wire**

With everything in place, add chicken wire around the whole thing. The whole height of this is roughly 39" with the chicken wire, but 36" to the stakes only.

## 8

### Make a gate

Lastly, I made a gate to keep the bunnies and squirrels away from my strawberries, and it was super simple - literally a rectangle with chicken wire stapled around it! I added hinges and a gate latch, and voila! I also cut the stakes on the inside down so they don't get in the way when we're tending to the plants.
