

Shaker Toybox / Children's Work Table

By **The Reformation Woodshop**

Difficulty

Easy

Toyboxes are not typically associated with any class of high end furniture. I designed this shaker style toy box to change that! This maple storage solution doubles as a work table and can easily be converted into a coffee table once the kids have outgrown it!

2" FRAME PIECES ON ALL SIDES. SHORT
FACES HAVE AN 1 1/4" STILE TO COMBINE
WITH THE OTHER FRAME TO MAKE 2"

Directions

1

Cut

Cut the pieces that make up the body of the box.

2**Cut**

Cut a rabbet in all of the pieces to fit a 1/2 bottom.

3

Join

Join all of the pieces together with pocket holes and glue.

4**Cut**

Cut the frame pieces that will make up the panels on the box.

5

Screw

Pocket hole all of those pieces and join them together.

6**Glue**

Glue and nail your panels to the faces of the box.

7

Build

Construct the lid from the same material as the panels and secure a piece of 3/4" plywood in the center.

8

Attach hinge

Attach the lid to the toy box with a 24" piano hinge.

IMPORTANT: Remember to take precautions to ensure children's safety around the toy box. If children will have unsupervised access to the toy box, use soft close toy box hinges or struts instead of the piano hinge.

9

Create Groove

Use your router to create a finer groove in the lid.

10

Protection

Finish your toy box with a clear coat to protect it.

11

Clean

Clean up the floor!

12

Finished!

And get to work!
