Sander

Materials

Wood Products

1 Board , 1x8 , 96"

Hardware & Supplies

4 Kreg Jig Screws

4 Kreg Jig Plugs

1 Wood Glue

Cut List & Parts

1 Top Plate , 3/4"x7 3/4"x28"d

2 Legs , 3/4"x7 3/4"x8"

Directions

1

Cut Wood

Cut top shelf to 28 inches long and the two legs to 8 inches long, or according to the measurements for your particular cabinet.

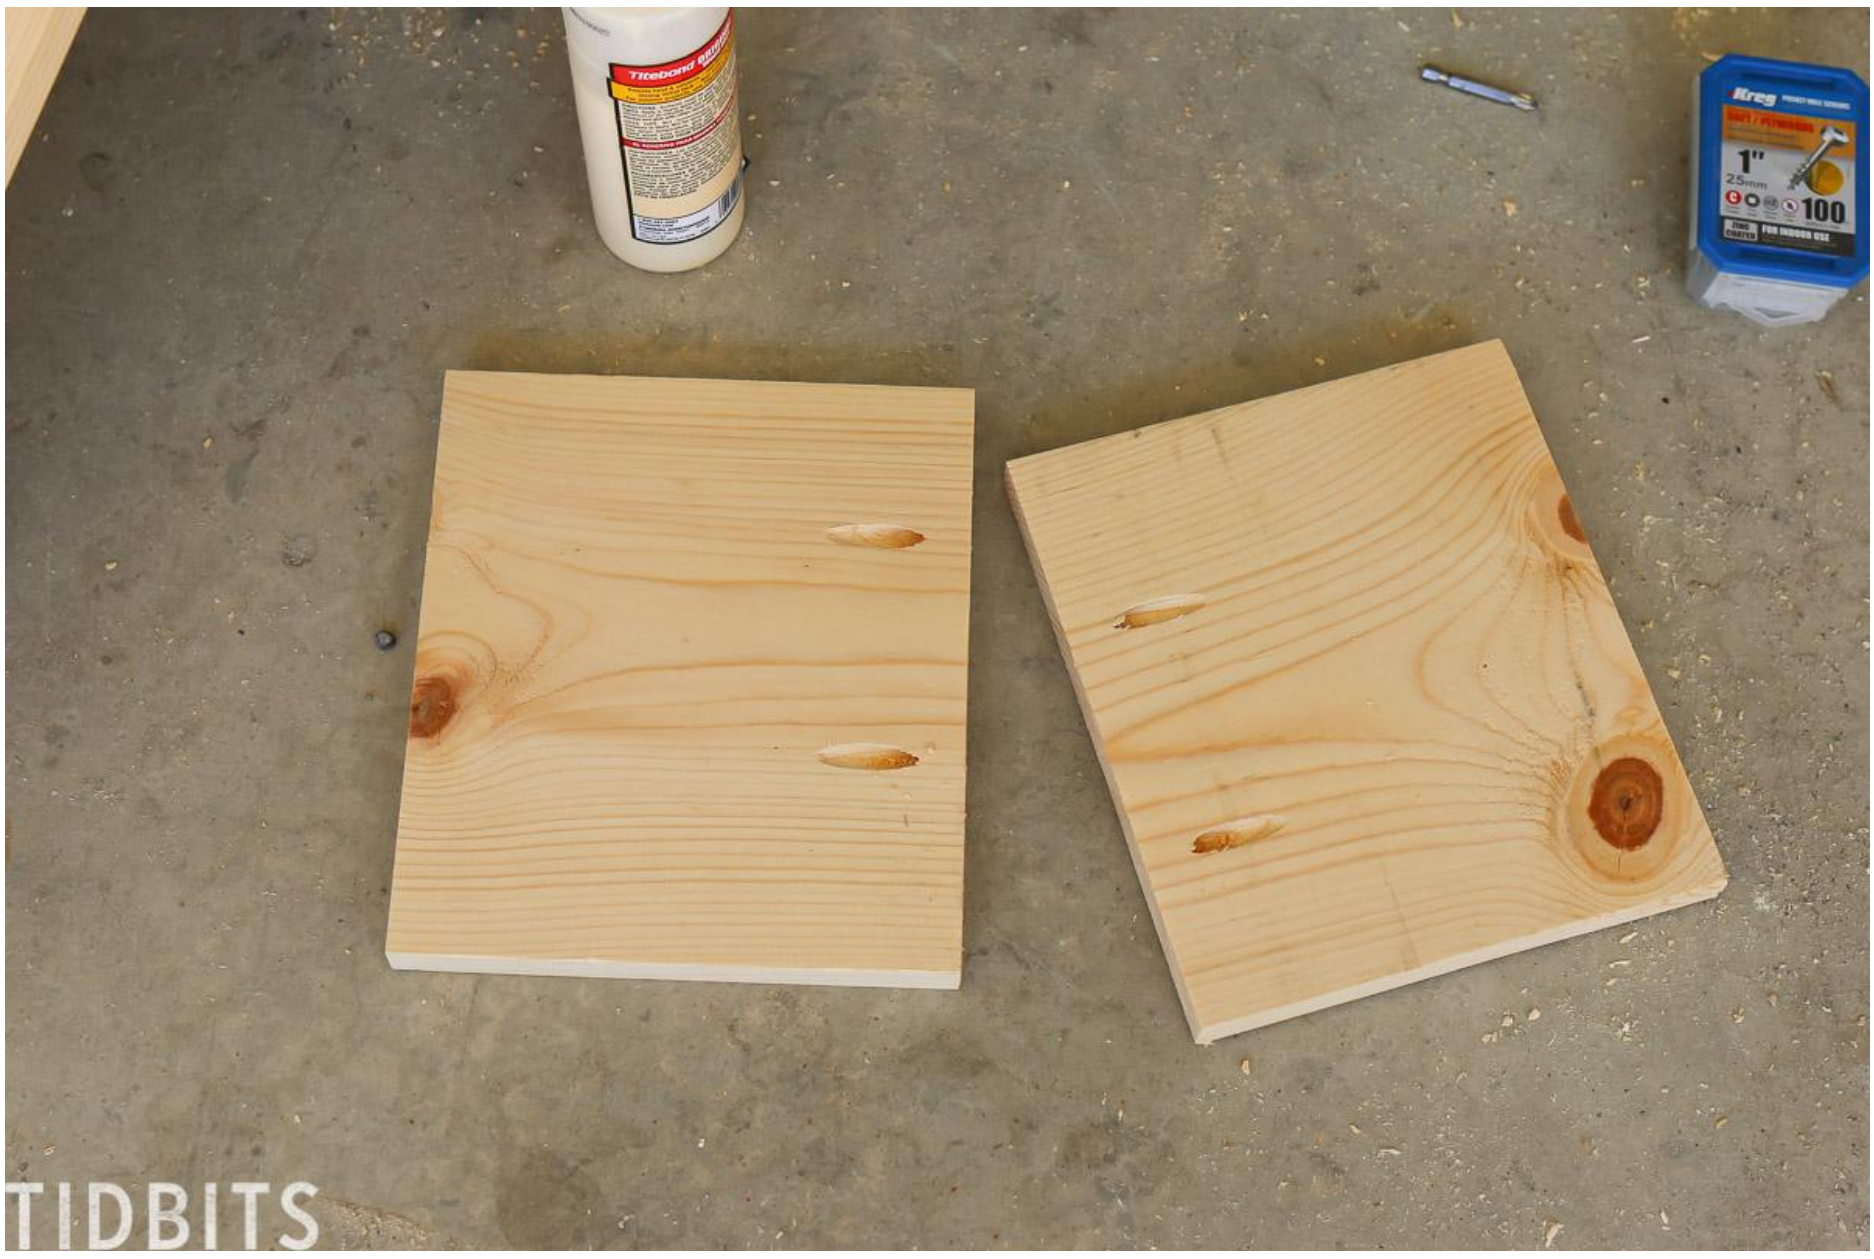

2 Pocket Holes for Shelf

Using the Kreg jig pocket-hole jig, drill two holes on one of the legs, evenly spaced apart. Holes should follow the grain.

3 Pocket Holes for Second Leg

Repeat for both legs.

4 Glue Edges

Glue the ends of the legs where the holes are and the ends of one of the faces of the top shelf.

5 Screw in Legs

Using Kreg jig screws attach legs to the top plate. Be sure the screw holes are faced towards the center of the shelf.

6 Prepare for final finish

Use Kreg Jig plugs and glue to fill in the screw holes then once dry, sand all surfaces flat and smooth.

7 Finish Wood

Apply paint or stain based on your preference. We used pickling stain with a polyurethane coat to lighten the color of the pine.
