* TO BE TRIMMED TO FINAL DIMENSIONS AFTER GLUE UP OR WHEN CUTTING DADOS

Directions

1

Cut & Rip Boards

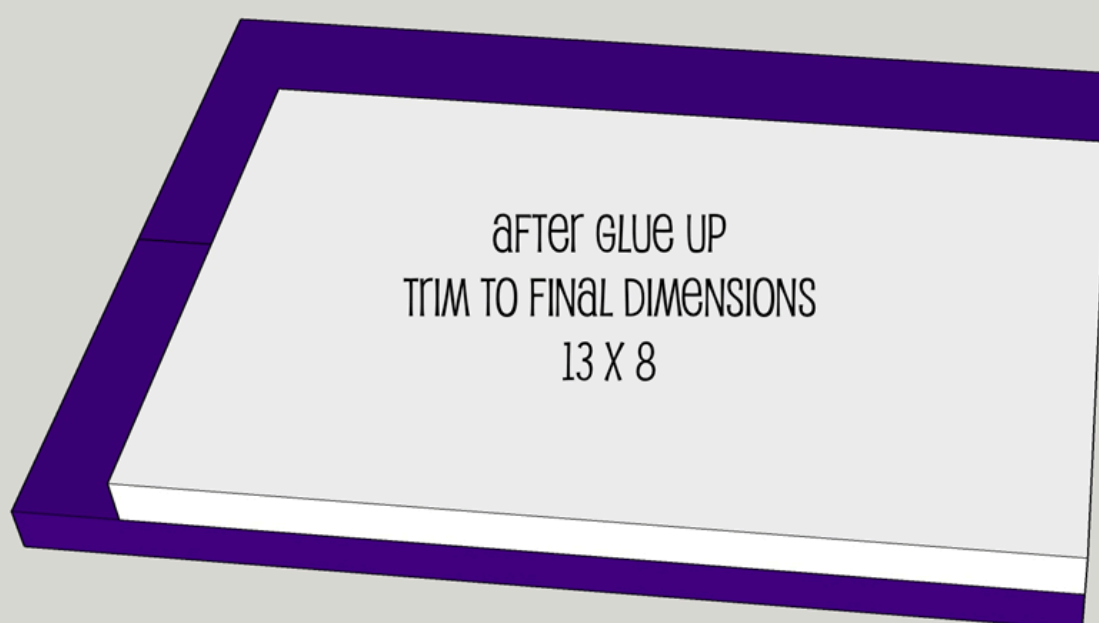

Cut board to final pieces sizes using miter saw - SEE CUT LIST. Then rip ALL boards to 5 1/4" Wide. ***NOTE: Cut the top/lid at the same time as side pieces to ensure they are the same length - 14.5"

3/4 X 14 1/2 X 5 1/4 SIDE 1	3/4 X 14 1/2 X 5 1/4 SIDE 2	3/4 X 14 1/2 X 5 1/4 BOTTOM 1*	3/4 X 14 1/2 X 5 1/4 BOTTOM 2*	3/4 X 8 X 5 1/4 END 1*	3/4 X 8 X 5 1/4 END 2*	
--------------------------------	--------------------------------	-----------------------------------	-----------------------------------	---------------------------	---------------------------	---

* TO BE TRIMMED TO FINAL DIMENSIONS AFTER GLUE UP OR WHEN CUTTING DADOS

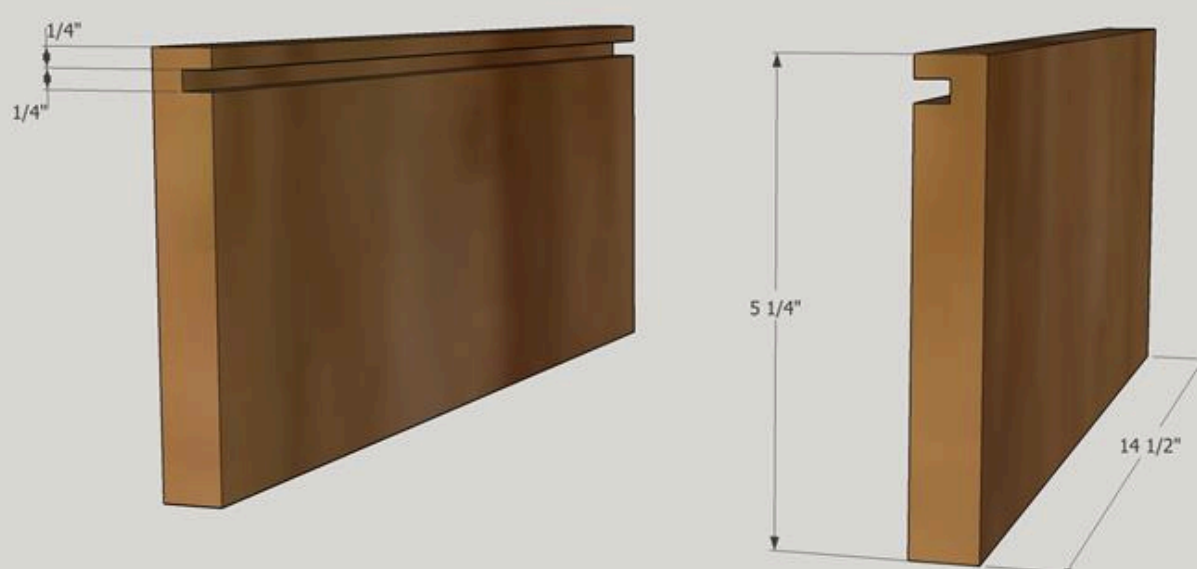

2**Glue Bottom Pieces Together**

Glue and clamp two (2) of the 14.5" pieces together for the bottom. Set aside til dry. ***NOTE: This step is not necessary if making box out of plywood.

3**Rip Dado for Lid**

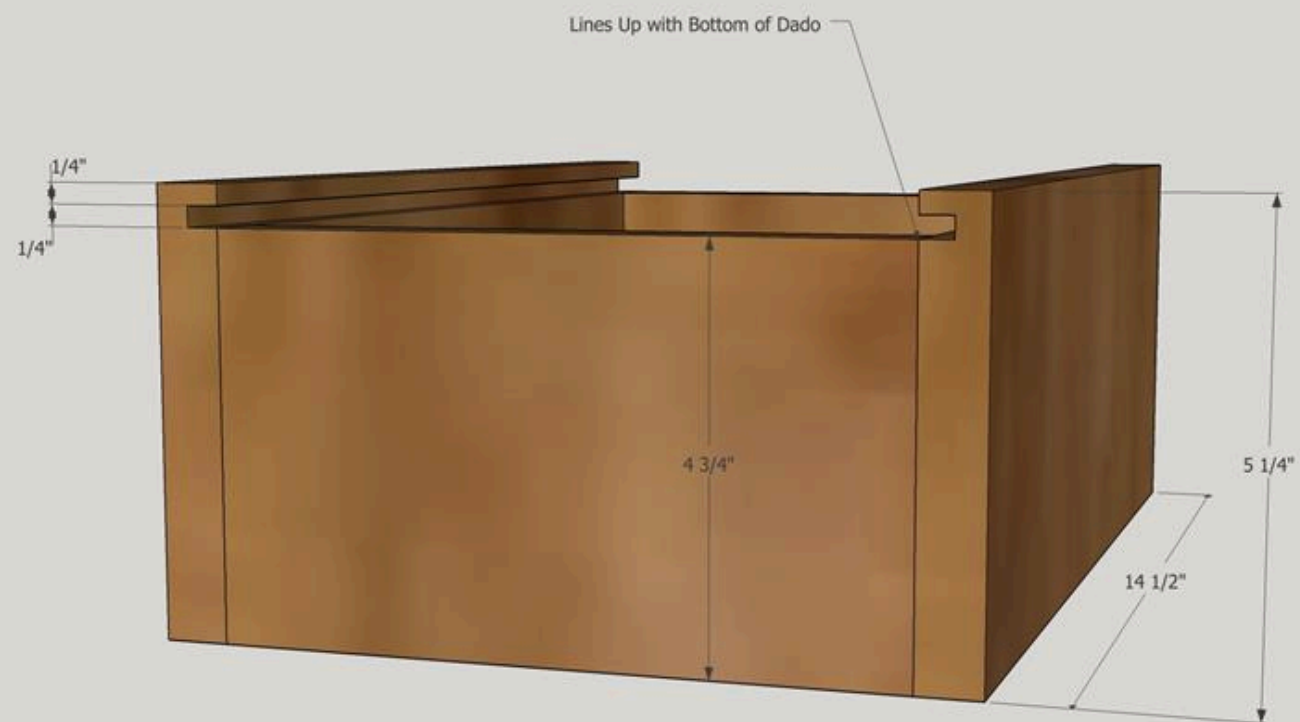

Set table saw blade to $\frac{1}{4}$ " in height and set fence at $\frac{1}{4}$ ". Run all four (4) side pieces thru. Then adjust fence to $\frac{3}{8}$ " and run the two (2) long (14.5") side pieces thru. This should give you a $\frac{1}{4}$ " dado for the lid to slide thru - verify it slides easily before moving on. Make any adjustments as necessary.

4

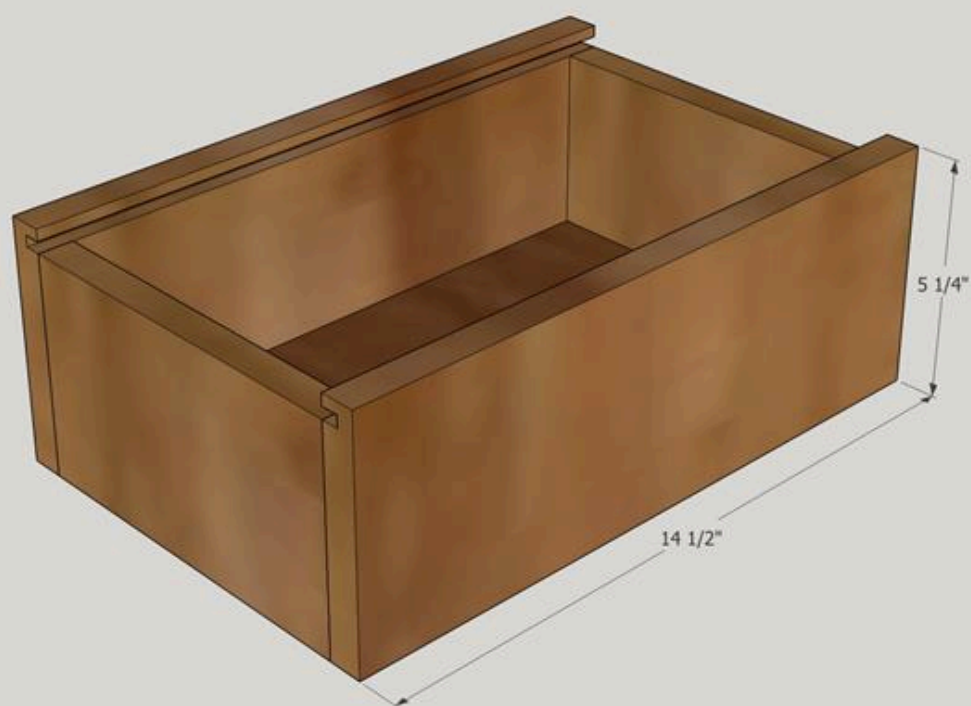

Trim End Pieces

Raise table saw blade up to just cut thru the 3/4" material and then run the (2) end pieces thru. Be sure to use a push block or a micro jig to safely cut these pieces.

5**Assemble Box**

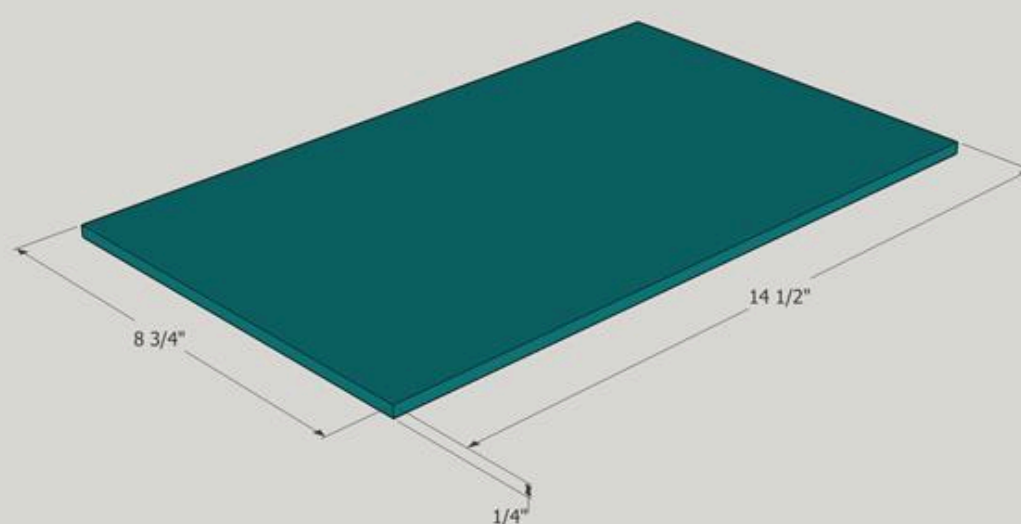

Assemble box using wood glue and 23 ga pin nails 1 1/4" long. Use clamps if necessary to hold pieces together during assembly.

6**Rip Lid**

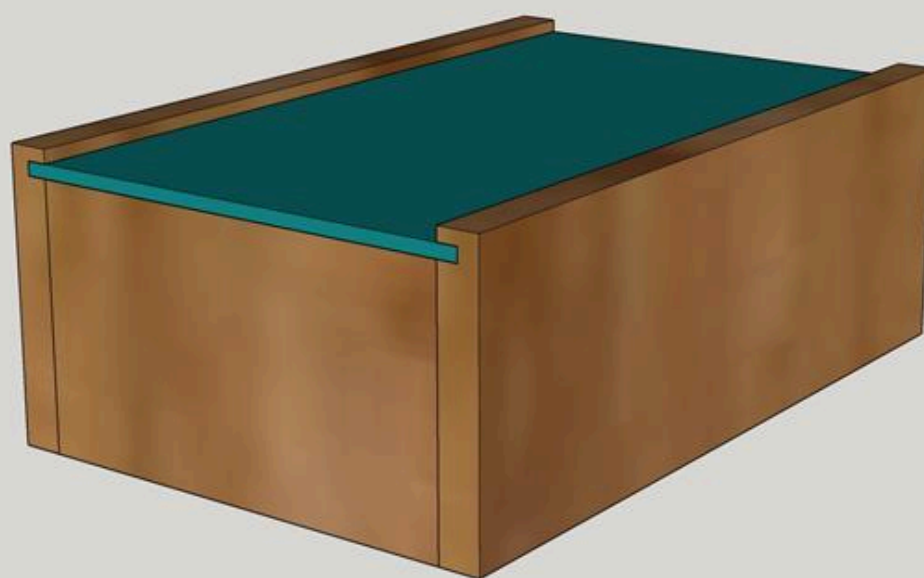

Rip lid to its final width. Should be approximately 8.5" Wide, but be sure to measure your box for exact measurements.

***Note: length of lid should have been cut at same time as the long side pieces to ensure same length.

7**Fill, Sand & Finish**

Fill any gaps with wood filler, sand to desired grit, and finish with you desired finish.

8

Install Hardware

Using the Kreg Cabinet Hardware Jig drill holes for your desired pulls and install.

9**Add Lid & Embellish**

Insert lid and you have a finished DIY Keepsake Gift Box. You can engrave the box with a meaningful message, embellish with decorative details, or hand paint a message to make it extra special. Oh and the last step is to fill it with something special, like two bottles of wine, and give it to a loved one.
