

Build a Rolling Storage Cabinet

Difficulty
Moderate

An easy to build cabinet on casters with a tile top, and a shelf behind the door. The cabinet is counter height and the perfect addition to a small space.

- 2 Case Sides , 3/4" Plywood At 11-7/16" X 33"
- 3 Case Top, Bottom & Shelves , 3/4" Plywood At 11-7/16" X 22-1/4"
- 2 Face Frame , 1x2 At 20-3/4"
- 2 Face Frame , 1x2 At 33-1/4"
- 1 Back , 1/4" Plywood At 23" X 32-1/4"
- 2 Door Frame , 1x3 At 16-1/4"
- 2 Door Frame , 1x3 At 30-3/4"
- 1 Door Panel , 1/4" Plywood At 16-3/4" X 26-1/4"

Directions

1**Step One**

Cut the pieces for the sides, top and shelf. With the pocket hole jig set for $\frac{3}{4}$ " material, drill pocket holes in each end of the top, bottom and shelf. Assemble the case using glue and $1\frac{1}{4}$ " pocket hole screws.

DESIGNS BY
STUDIO C**2****Step Two**

Cut the piece for the back. Secure the back to the case using $1\frac{1}{2}$ " brad nails.

3

Step Three

Cut the pieces for the face frame. Drill pocket holes in each end of the shorter pieces. Assemble the frame using glue and 1-1/4" pocket hole screws.

Position the face frame on the case with the sides and bottom flush. (Remember: the top of the face frame will sit 1/4" higher than the case to accommodate the tile.) Secure in place using glue and 1-1/2" brad nails.

4

Step Four

Cut the pieces for the door frame and drill pocket holes in each end of the shorter pieces. Assemble the frame using glue and 1-1/4" pocket hole screws.

Using a router and a 1/4" rabbeting bit, cut a 1/4" deep rabbet along the inside back of the frame to accommodate the panel. Use a chisel to square the corners so the frame will fit (the corners of the panel can also be rounded.)

5

Step Five

Cut the 1/4" panel to fit, then secure to the door frame using glue and 1/2" brad nails.

6

Step Six

Finish the cabinet as desired, then install the door following the manufacturer's installation instructions for the hinges. The door will overlap the opening by 1/4" on all sides.
