

OUTDOOR SOFA

MADE FROM 2X6S

This DIY outdoor sofa is made out of pieces of 2x6 that are screwed together with pocket holes.

1. CUT THE 2X6S

SEAT BOARDS:

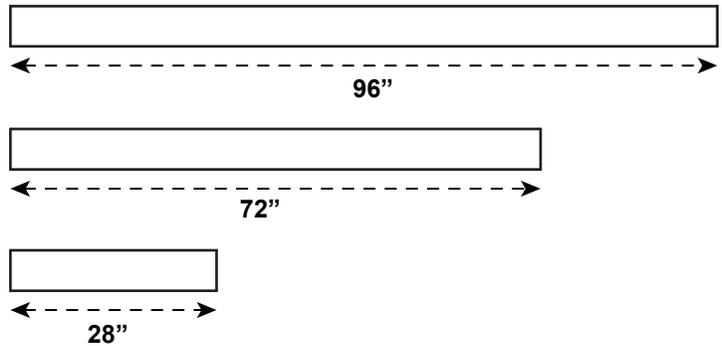

Cut 5 pieces of 2x6 at a length of 96"

BACK REST:

Cut 2 pieces of 2x6 at a length of 72"

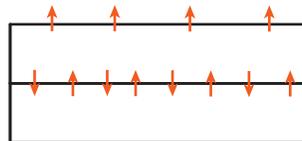

LEGS AND ANGLE SUPPORTS:

Cut 6 pieces of 2x6 at a length of 28"

2. ASSEMBLE THE LEG PANELS

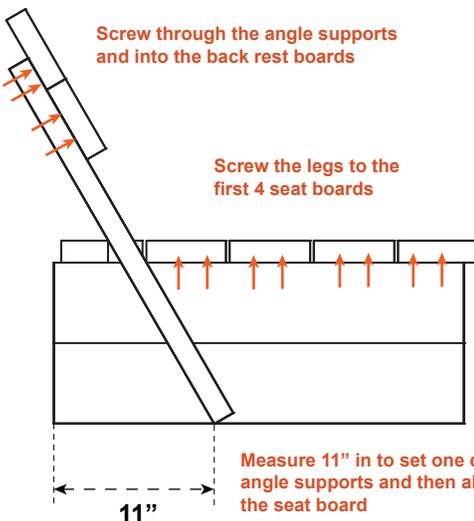

Use pocket holes to connect the pieces. I placed on the holes on the inside or under side of the pieces so that they would be less visible.

POCKET HOLES WITH COATED DECK SCREWS

3. ASSEMBLE THE SOFA

- Screw the leg panels to the first four seat boards leaving 1/4" gaps.
- Screw the angle supports to seat panels with pocket holes
- Cut notches in the last seat board to fit around angle supports
- Screw on back rest boards

Use pocket holes to screw angle supports to inside of leg panels
