

# MDF BOOKSHELF

This DIY book shelf is made out of 3/4" MDF. This guide is meant to accompany a youtube video on the Kreg channel.

1. Cut four strips of 3/4" MDF 12" wide and at least 36" long.
2. Cut two shelf boards between 24" and 36" long
3. Cut out the side panels as show in the drawing.
4. Use pocket holes and screws to connect the shelves to the side panels.
5. Add a middle support between the 2 middle shelves with pocket holes and screws.

Cut with jigsaw and save for middle support

Cut with jigsaw and save for end shelves
